Commercial Customers

The following list contains some common preparations made prior to bed bug treatment. This is not an all-inclusive list.

- Remove all clutter, boxes, bags, etc. around cubicles.
- Remove items from drawers, desktops and under desk.
- Move all furniture at least 18" from the wall so you can inspect and treat the carpet edge and baseboards where bed bugs prefer to hide.
- Vacuum the entire carpet with a crevice attachment, especially the edges.

After services have been completed:

After a treatment please wait 6-8 hours before returning to area being treated. Wipe down desktops and all personal items you might think is necessary.
